A Core Curriculum for Nurse Life Care Planning

A Core Curriculum for Nurse Life Care Planning helps registered nurse life care planners prepare to take the CNLCP credentialing exam and serves as a foundation for a successful nurse life care planning practice. This textbook is based on the nursing process of assessment, critical thinking, and nursing diagnoses, and it also covers applying nursing research, evidenced-based practice, case management skills, and legal nursing practices. Written by practicing nurse life care planners and peer-reviewed by AANLCP member nurse life care planners, this core curriculum includes basic nurse life care planning knowledge on - The history of nurse life care planning - The use of critical thinking in the life care planning process - How to critique a life care plan - How to address spinal cord injuries, traumatic brain injuries, chronic pain, amputations, burns, cerebral palsy, and considerations with aging - How to understand disability rights laws - The legal aspects of nurse life care planning - Litigation processes Providing a foundation to encourage nurse life care planners to research and learn, A Core Curriculum for Nurse Life Care Planning offers a valuable resource for nurses practicing in this field.

Nurse Life Care Planning Scope and Standards of Practice

Care Planning in Children and Young People's Nursing addresses a selection of the most common concerns that arise when planning care for infants, children and young people within the hospital and community setting. Clear and detailed, this text reflects both the uniqueness and diversity of contemporary children's nursing and utilizes images and case studies to provide a holistic insight into the practice of care planning through the reporting of best available evidence and current research, policy and education. Divided into sections for ease of reference, Care Planning in Children and Young People's Nursing explores both the theory and practice of care planning. Chapters on the principles of care planning include issues such as managing risk, safeguarding children, ethical and legal implications, integrated care pathways, interprofessional assessment, and invaluable parent perspectives. Additional chapters on the application of planning care examine the practical aspects of a wide range of specific conditions including cystic fibrosis, obesity, cardiac/renal failure and HIV/AIDS. Each chapter is interactive, with questions, learning activities

and points for discussion creating an engaging and enquiry-based learning approach. Care Planning in Children and Young People's Nursing is a definitive resource, reflecting innovative practice which is suitable for undergraduate and postgraduate nurse education.

Legal Nurse Consulting Principles and Practices, Fourth Edition, provides foundational knowledge on the specialty nursing practice of legal nurse consulting. Legal nurse consulting is defined, and essential information about the practice is discussed (history, certification, scope and standards of practice, and ethical and liability considerations). The essentials of the law and medical records are explored. Analysis of the various types of legal cases on which legal nurse consultants work is provided, as are other practice areas for legal nurse consultants. The various roles and skills of legal nurse consultants are explored, and the textbook concludes with discussion of the ways in which legal cases are adjudicated. This volume allows nurses to bridge the gap from their clinical experience to the unfamiliar territory of the legal world, with practical advice on topics including tactics for being cross-examined in the

courtroom and investigative and analytical techniques for medical records. Individual chapters by subject-matter experts focus on the full range of legal, medical, and business issues that new or experienced legal nurse consultants and nurse experts will encounter in their work. A nuanced look at the realities and complexities of toxic torts, medical malpractice cases, civil rights in correctional healthcare, ERISA and HMO litigation, and other practice areas is offered. Suitable for experienced nurses studying for certification as legal nurse consultants, and for expert witnesses, practitioners seeking to expand their current legal nurse roles, and other healthcare and legal practitioners.

Nursing Care Plans

The aim of this practical textbook on the teaching of care planning is to identify the changing role of nurse teachers, to help them identify the skills which learners and staff must acquire to plan systematic nursing care and to provide practical help and guidance on methods of teaching these skills. Examples of skills workshops have been included.

Skills for Care Planning

Developing a sound, evidence-based plan may seem like a daunting task, but it doesn't have to be. In this first edition of *Samples for Success: Life Care Plans from Practicing Life Care Planners*, readers can access over nine different injury or illness categories. The author doesn't provide just one sample, but rather 25 redacted life care plans by practicing life care planning professionals. New life care planners as well as the experienced will find this book to be an invaluable asset to their life care planning practices. In addition to complete sample life care plans, contributors candidly share the emotional highs and lows of litigation. With stories of limited access to the injured party to the "kick-me" moments of testimony, this book shares the in-the-trenches experiences of the life care planner associated with each case. To top it off, readers have access to 10 Curricula Vitae (CV) examples provided by each contributor and a plethora of research references and resources.

Samples for Success

73 conceptual nursing care plans are based on Giddens concepts. Logical format for conceptual nursing care plans includes a definition of the concept, clinical problems, common causes, manifestations, outcomes, interventions, related concepts, and related clinical problems. Guidance for prioritized care planning organizes interventions in an assess-intervene-teach format, to help identify the most important priority interventions for patients. Use of standardized nursing language conveys concepts and clinical problems in easily understandable language that is commonly used in clinical settings, organizing care plans around terminology recognized by the American Nurses Association and easily understood by other healthcare professionals. UNIQUE! Wide-ranging approach covers concepts that are not addressed in other texts, such as health disparities, risk in pregnancy, impaired immunity, substance use, sensory deficits, continuity of care, and the dying process. Introduction opens the book by explaining the components of a conceptual nursing care plan and how to use the book to create patient-centered nursing care plans. Conceptual Care Map Creator on the Evolve website helps document care planning projects and clinical assignments. Expert authors Mariann Harding and Debra Hagler

are nursing thought leaders and editors of the bestselling Lewis's Medical Surgical Nursing: Assessment and Management of Clinical Problems.

Conceptual Nursing Care Planning

Develop a care program to meet a child's individual needs with this essential guide. Even seemingly minor decisions can have a significant impact on the early development of a child, so it is essential for children to receive a carefully tailored program designed to meet the needs and concerns of each individual child. Life Care Planning and Case Management Handbook

This book is pocket-sized and compact with personalized nursing care plans. The Roper Logan and Tierney Activities of Daily Living have been used as a guide. The care plans have been developed from scenarios based on fictitious characters. I do apologize if any of the names or dates of birth match anyone reading this book as this would be coincidental. The days can be busy caring for our patients, and I do hope that this book will be regarded as a friend that will be there in times of need. In

taking into account the increased workload that nurses face daily, this book aims to become the nurses companion.

Care Plans in Reality

Designed to help students learn how to create nursing care plans and effectively document care, this practical book focuses on the nursing plans that are most important, ensuring that students learn what they need to know and that they can find the information they need easily without being distracted by irrelevant information. Packed with easy-to-understand information and focused on helping students develop critical reasoning skills, this respected text presents the most likely nursing diagnoses and collaborative problems with step-by-step guidance on nursing actions and rationales for interventions. More than 85 nursing care plans translate theory into clinical practice. This exciting revision includes special risk consideration icons called “Clinical Alert” (derived from the most recent IOM report) that integrate patient-specific considerations into each care plan. Other enhancements include a streamlined format for easier use; new care plans for maternity, pediatric, and mental health nursing.

Nursing Care Plans

Nurses of the future need to accurately assess people of all ages, with varying mental and physical problems, across different settings and with changing health needs. This book introduces student nurses and novice practitioners to the assessment process enabling them to identify patient problems in order for solutions to be planned and implemented. Linked to the NMC Standards and Essential Skills Clusters for degree-level education, and with detailed case studies and scenarios demonstrating practical application of key theory, the book encourages critical thinking and urges students to consider the social, cultural, psychological and environmental factors as well as the physical symptoms that may be present when making assessments.

Life Care Planning and Case Management Handbook

The Care Coordination and Transition Management (CCTM) Core Curriculum (2nd Edition) offers content developed by experts that will provide RNs with the knowledge, skills, and attitudes to practice in all health care settings today and tomorrow. The CCTM Core Curriculum will help RNs to: practice at the top of their license and become certified in CCTM; enhance interprofessional collaboration and communication; enhance safety and quality of patient outcomes; consistently provide best evidence-based assessments and interventions; gain expertise in population health management; tap into nurse-sensitive outcome metrics; enhance RN informatics knowledge and skills; use big data effectively to manage populations; enhance access to high-quality care; decrease ED use and readmission; decrease health care costs; and expand knowledge of resources and apps used in CCTM.

Understanding the Nursing Process

Introduces all the core topics and essential information that nursing students, in all specialisms, will need to master during the first years of a nursing degree.

ALM Experts

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of

nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Care Coordination and Transition Management Core Curriculum

Compiles all the basic competencies for adult oncology nursing, as approved by the ONS. Updated to reflect the certification test blueprint outline, chapters discuss such topics as ethical issues, cancer survivorship issues and HIV. New coverage includes on supportive therapies and procedures.

Essentials of Nursing Practice

This completely revised fourth edition of a comprehensive core text for advanced health care practitioners is distinguished by its focus on the increasing role of the APRN in primary care of the multiple sclerosis (MS) patient, the importance of involving the interdisciplinary team in different aspects of care, and the imperative of early and aggressive symptom interventions. Written by expert clinicians in easy-to-read outline format, the text includes the most current diagnostic tools and strategies for managing the disease process in both physical and psychosocial areas, with an emphasis on helping MS patients cope with the disease through the teaching and implementing of self-care strategies. New content throughout includes a chapter on pain management, updated findings on primary care issues, neurologic complications, and the interrelated importance of interdisciplinary coordination, the role of ethics, professionalism, and the ability to deliver culturally competent care. New diagnostic tests and pharmacologic strategies provide an extensive arsenal of improved treatment options, and updated guidelines for managing symptoms address impaired mobility and bladder/bowel dysfunction.
